CUNJINDI / EXPORT DESK

Huili pomegranate

A short brief for importers, wholesalers and retail programme buyers

PRODUCT AND PLANNING WINDOW

Origin	Huili, Sichuan, China
Options	Soft-seeded: August - November; sweet-tart: August - February. These are usual supply windows; available lots are confirmed for each order.
Selection	Discuss fruit weight, appearance, taste preference, carton net weight and labels for your sales channel.

A REFERENCE FOR TASTE, WITH A DATED SOURCE

Supplier samples tested on 20 September 2026: soft-seeded 18.2-18.5 degrees Brix; sweet-tart 18.9-19.8 degrees Brix.

These samples are not linked to an identified shipment lot. They are a reference, not an order-wide minimum or third-party test report.

TO PREPARE SUITABLE OPTIONS

1. Which pomegranate type, and roughly how many kg, tonnes or cartons?
2. Where should it arrive, and in which month or date window?
3. Share your size/packing specification or a reference photo, if you have one.

We will use these details to check a suitable lot, packing and quotation. Stock, price, shipment dates and destination requirements are confirmed per order.

Send your requirements in your usual format.
